Summary

Full-Stack AI Engineer with 5+ years of experience building scalable web applications and AI-powered SaaS platforms end-to-end. Architected multi-agent workflows and RAG-grounded LLM systems for financial services, including an autonomous WhatsApp collection agent operating at production scale. Strong across React, Node.js, and AWS, with a track record of shipping reliable, production-grade AI systems. Passionate about using agentic AI to automate real business operations, not just prototypes.

Professional Experience

LUNASH - Full-Stack Developer

Sep 2024 - Present

Jakarta, Indonesia

- Architected an end-to-end debt-collection SaaS platform, integrating TraceLink for automated skip tracing with a multi-agent AI system that autonomously runs collection campaigns without manual intervention.
- Engineered LLM prompt strategies and a RAG-grounded pipeline that automatically pulls live customer payment history and DPD (Days Past Due) risk data into agent context, reducing hallucinated responses and removing manual data lookup from the conversation flow.
- Designed and orchestrated a multi-agent n8n workflow, combining CRON-triggered outreach with a periodic reply-monitoring loop (60 min interval) that auto-routes ~8,000 daily debtor conversations to specialized agents (intent detection, negotiation, follow-up) by DPD risk profile, achieving a 40-60% reply rate.
- Built full-stack infrastructure (React/Vite, Node.js/TypeScript) on AWS (EC2, S3, RDS, SQS, CloudWatch), engineering a fault-tolerant, queue-based pipeline with SQS retry to power operational dashboards and high-volume, real-time AI conversation workflows reliably.

HACKTIV8 - Full-Stack JavaScript Instructor

Jan 2020 - Sep 2024

Jakarta, Indonesia

- Promoted to Lead Phase Instructor; led a team of 6–8 instructors, owning learning delivery, curriculum quality, and instructor performance across multiple batches.
- Trained and mentored 1,000+ engineers in Full-Stack JavaScript through project-based learning, covering React, Node.js, and modern JS tooling.

Freelance Projects

Applied AI Engineer Program - Subject Matter Expert, Curriculum Developer

Aug 2026

Designed and reviewed curriculum covering RAG, LangGraph, n8n, AI agent workflows, automation, pgvector, and Chat Bot integration. Built a multi-stage capstone covering data pipeline, AI, and automation layers.

AL+ Agent - Full-Stack Developer (AI Agent)

Sep 2025 - Feb 2026

Built and shipped a WhatsApp AI agent that automates end-to-end customer conversations and lead qualification, using n8n agentic workflows with Next.js, Supabase, WAHA, and the WhatsApp Business API.

Auto Agent - Full-Stack Developer

Dec 2024 - Feb 2025

Built a Chrome Extension automating data entry and application navigation for operational agents, eliminating repetitive manual workflows.

Educational Background

APPLE DEVELOPER ACADEMY

Feb 2023 - Dec 2023

Graduate of the Apple Developer Scholarship Program

INDONESIA UNIVERSITY OF EDUCATION

Aug 2015 - Oct 2019

Bachelor of Education in Computer Science, GPA 3.72

Technical Skills

- **Programming Language:** JavaScript, TypeScript, Go
- **AI & LLM:** OpenAI/Claude, Multi-Agent Systems, RAG, Vector DBs (pgvector), MCP, LangChain, n8n
- **Frontend:** React, React Native, Next.js, Zustand, TanStack Query, Tailwind CSS
- **Backend:** Node.js, Go (Gin), REST APIs, GraphQL, gRPC, WebSockets, Vitest/Jest (Unit Testing)
- **Data, Cloud & DevOps:** PostgreSQL, Redis, AWS (EC2, S3, RDS, SQS), Docker, GitHub Actions (CI/CD)
